PROFILE

-Full-stack developer building modern web applications with React and Next.js. I focus on clean UI, scalable backend logic, and writing maintainable, performance-oriented code.
I enjoy designing complete systems from frontend to backend while continuously improving my skills through real-world projects.

SKILLS

Frontend & Backend Development
React.js, Next.js, Tailwind CSS, GSAP, Nest.js, Node.js, Express.js, REST APIs, Next.js API routes, WebSocket

Languages / Programming Skills
JavaScript (JS), TypeScript (TS)

EventQueues
Redis, RabbitMq

Database(SQL/NoSQL)
MongoDB , Postgresql, Redis

Version Control
Git, GitHub

PROJECTS

Ai-side-builder , *This platform that helps you turn ideas into real websites in minutes*

- An intelligent platform that helps you turn ideas into real websites in minutes. Just describe what you want, preview the result instantly, and refine it through simple requests. Built for speed, creativity, and flexibility — so you can focus on ideas, not complexity.

Quick.ai , *All-in-one AI assistant for writing, image editing, and resume review.*

- An all-in-one AI-powered platform that allows users to create articles, blog titles, and images, as well as remove backgrounds or unwanted objects from any picture. It also includes an AI resume reviewer for smart improvement suggestions. Built using React, Node.js, and PostgreSQL, integrated with advanced AI APIs. Optimized for 30% faster processing, delivering accuracy in image editing tasks and improving content generation efficiency.

SoundQ , *Where the next big hit is chosen by music fans.*

- A community-driven music voting platform where users can add their favorite songs and vote for others. Songs are ranked in descending order based on votes, making it easy to discover trending music. Built using Next.js, Prisma, and PostgreSQL for a fast, scalable, and reliable experience.

EDUCATION

2024 – 2028 **swami vivekananda university,** *Bachelor of Computer Applications* (*BCA*)
